

## Key Largo Casino unveils their exciting new slots!

Delia Willems of the Key Largo Casino was proud to display the glittering new slot machines that were just installed at Aruba's newest casino next to the La Cabana Resort. These sparkling new machines have some interesting new rewards, allowing players the possibility of winning a linked progressive prize that is a minimum of \$1000, with an investment of only \$1.80.

Mike Fralick of AC Coin out of Atlantic City explained the workings of the new slots, which require a twenty-five cent minimum buy-in and works with one-cent credits. Five reels provide nine lines of play, and a player can bet up to twenty credits for each line, for a maximum bet of \$1.80, which is required to win the progressive. The six machines are linked, so the progressive increases with each turn of the drum at any of the machines. Assisted by Key Largo Slot Tech Francis Silva, Mike had the machines up and running for anxiously awaiting customers on Thursday evening, and within minutes, some lucky players were already receiving a payout.

These new machines are the only in Aruba to offer a bonus round when the player hits either the pirate or bankroll symbols on a line, and pays out 50,000 credits when one hits the jackpot on the bonus round, so again, for a very small investment, slots fanatics can win big!
